Certificate

for the Cosmetic product

SYNERGETIC Natural Bar Soap Eucalyptus and Sage

Dermatological test on humans in 2021

Study number: 2109131400

The dermatological test performed by us on your product under the control of dermatological specialists was passed for this product with the rating of

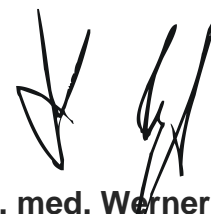

„excellent“

With the tested preparation less than 10% of the test persons showed very mild transient reactions in the epicutaneous test performed with subjects having sensitive skin according to international guidelines. For all other subjects this product did not lead to any toxic- irritative intolerance reactions.

Sporadic, mild reactions in the epicutaneous test are normal in a test group and must be seen in the context of the test conditions in contrast to the intended use. Thus the product is not restricted in the evaluation "dermatologically tested".
